Versatile Display. Many Features.

Flexible.
Series 3D70 is available with or without a projected capacitance touch screen. This advanced touchscreen works even when wet or when the user is wearing gloves.

Bright.
This 7.0-inch backlit WVGA LCD (800x480) is very bright (1000 nits) providing good daylight readability. It has software controlled LED backlighting and 16 bit color.

Powerful.
The powerful embedded computer can monitor and display many events and camera images simultaneously:
- 800MHz
- 512MB RAM
- 4GB storage
- USB 2.0

Useful.
Ideal for agriculture and construction vehicle applications, including virtual gauges, diagnostic menus, engine monitor, operator input, fault indicators and service reminders.

Easy to Program.
PC-based configuration tools makes application development fast and easy. Drag and drop graphics (supported by Qt and CODESYS), bitmaps, text with the click of a mouse.

Adaptable.
Designed for integration into off-highway vehicles. It functions in 12V/24V operation, boots in 3 seconds (VUI Builder) and is sealed against the ingress of liquids and dust.

Rugged.
The protective cover lens is scratch resistant glass, not plastic. Optical bonding of the cover glass improves impact resistance.

Adjustable.
There are many system interface options:
- Up to two CAN-bus ports
- Up to three NTSC/PAL camera input ports
- Up to two analog inputs
- Up to four digital inputs
- Up to four digital outputs
- One USB 2.0 port
- Ethernet
- Audio Line Out
- Touchscreen

Readable.
Optically bonding the display, touch sensor and cover glass reduces reflections. An anti-glare coating further improves readability in bright sunlight.
